Content Development

Training Content Development

Phase 4

Training Delivery

Online Training Sessions

Phase 5

Internal Marketing

Change Management

Strategy session

Building a PLM training program is more than just hiring trainers and putting PowerPoint slides together. The **PLM strategy** process considers the targeted teams, the training structure, the messaging and marketing. In our strategy session, we help you gain clarity to move forward through a bespoke workshop.

Strategy session

We'll approach the session systematically. First, you'll tell us about your challenges so that we can develop an understanding of your goals and the needs of your users. Then we'll ask questions, listen, synthesise, and report to give you an actionable, fresh perspective on your PLM training program.

We host a strategy session with you and your team to audit your current PLM documentation to understand who is doing what, why, and how.

We use our proven 5-point system to define your PLM Training Library structure

#1 Step One

#2 Step Two

#4 Step Four

#2 Step Three

We prepare a mock-up for you with the PLM library structure draft we defined together, and a proposal to continue working together.

We help you build a roadmap to hit the ground running.

Strategy session

We'll approach the session systematically. We'll have 2 4h online sessions to define your PLM Training Strategy

Session 1

Kick-off

Introduction

You'll tell us about your PLM environment so that we can develop an understanding of your goals and the needs of your users.

Session 1

Understand your learning customers

Who are your learning customers?

We categorize your users, define learner personas and set the learning goals.

Session 1

Training Library Modules

Training Library components

We'll use learning categories to create our learning structure and to organize, sort and filter the learning content

Session 1
2018

Training Library structure

Now that you've pinned down your categories, it's time to start thinking about the learning structure.

Analyse and map learning content

Analyse existing content and think of the materials needed to achieve the customer learning goals.

Session 2
Content Plan

Session 2
Content Plan

Project Plan

Once you're clear on what content matters most, we go ahead and create an action plan.

Equipment Structure Flow

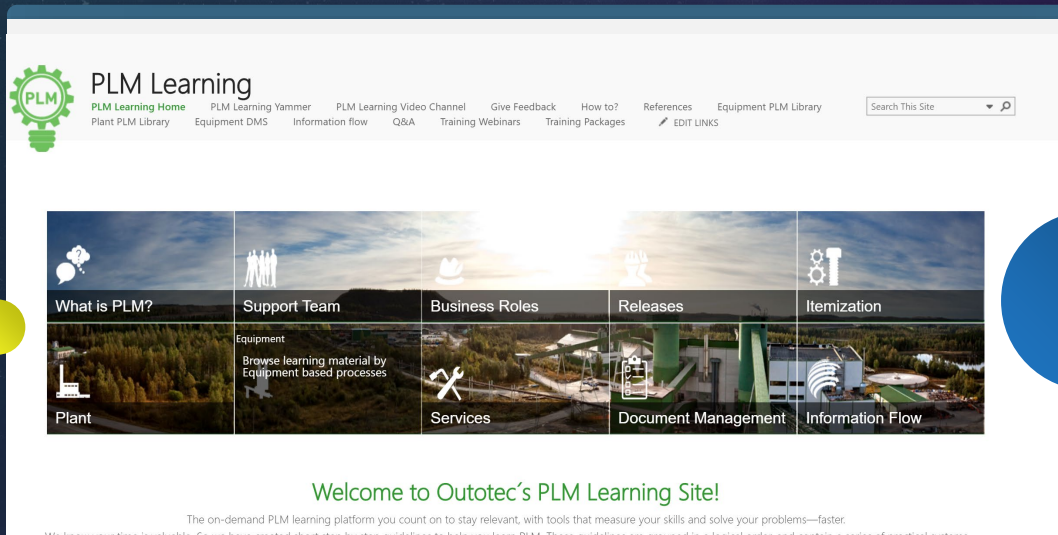

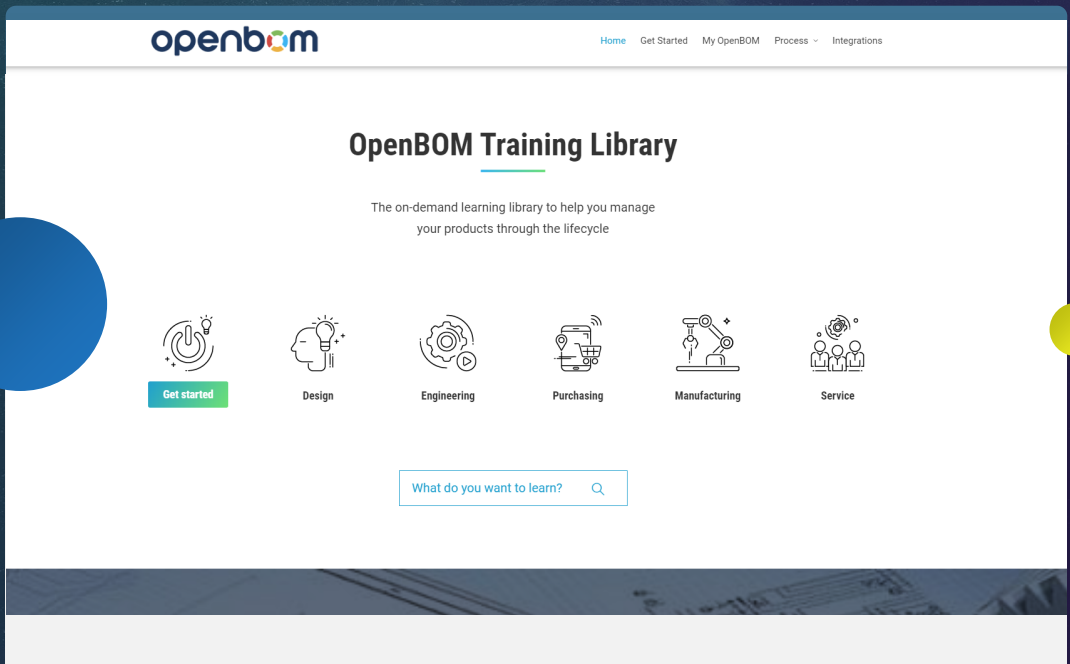

SETTING UP YOUR

Training Library

Setting up a digital PLM Training Library, tailored to your company's PLM implementation—connecting the process theory with the system practice—requires some thoughtful in-the-weeds work. We'll give your PLM concept a tune-up, then define with you a more efficient way to structure your PLM training library, so that your support model is set up to scale.

PLM Training Libraries

Defining what PLM means to your company is essential if you want your organization to understand the “Why” and to succeed at PLM. We can help you represent your company’s workflow to manage product information through the lifecycle and connect the process theory with the system practice.
